Abstract (en)
[origin: EP1577842A2] The device has three access authorization readers (12-15), and two person sensors e.g. optoelectronic sensors, provided in front of a locking unit (1) to detect entry of persons. The unit provides access to a detected person upon valid reading of an access authorization of the detected person by one of the readers. The unit blocks the access to the person upon invalid reading of access authorization by one of the readers.
