Abstract (en)

[origin: WO2004043139A2] The invention provides an inexpensive and highly nutritious source of food for mass production of rotifers, shrimp, larvae, and other filter feeders, such as oysters, clams, mollusks, and mussels. The invention provides a feed comprising a protein source, e.g., yeast, a macroalgal product, and a microalgal product in combination to enhance the growth of zooplankter and thereby the ultimate consumer of said zooplankter, a targeted cultured species.
