Abstract (en)

[origin: WO2004035498A2] The invention concerns a method for decorating a glass object such as a container or bottle which consists in: a) spraying on the glass object, using dry process electrostatic spraying, an enamel-based product, b) placing said treated object in an oven, for firing at a temperature ranging between 600 DEG C and 650 DEG C, for 15 to 25 minutes, c) using an enamel-based product comprising an enamel particle powder, and mixing by cold process the enamel-based product with one or more pigments, prior to step (a) so as to obtain a uniformly ground and coloured glass object.
