Abstract (en)  
[origin: WO2004059128A1] The invention relates to a cutting tool of a cutting machine, comprising a base part (20) and a bit holder (10). According to the invention, the bit holder is provided with a plug-in attachment (15), retained in a socket (22) of the base part and the latter has a stop (24) against which the bit holder rests. To prevent the penetration of water and stone dust and to allow the bit holder to be easily detached from the base part, a sealing element (30) is located between the bit holder and the base part, surrounding at least sections of the socket.
