Abstract (en)
[origin: WO2004057248A1] The machine for making ice cubes (1) comprises a device for spraying water (7) into a plurality of ice formation cells (9) externally associated with the evaporator (18) of a refrigerator group, at least one recirculation pump (11) which through at least one connection pipe (13) feeds the spraying device (7) with water to be transformed into ice taken from a storage tank (15), an access hatch (21) to a storage tank (19) for the formed ice cubes, and at least first connection means for connecting at least one of the hatch (21), the spraying device (7) and at least one portion of the tank for storing the water to be transformed into ice in such a way that it can be removed from the machine (1).
