Abstract (en)
[origin: WO2004059533A2] A distributed storage network of computers is disclosed in which a determination as to whether to store a data item at a computer connected to said network is made in dependence on a policy document associated with that data item. The policy document is constructed in accordance with a Document Type Definition expressed in eXtensible Markup Language (XML). This provides a more flexible method of system managed storage than has hitherto been achieved.
