Abstract (en)

[origin: EP1580093A2] u Track-guided vehicle comprises hinges (SNWG *>, SWG *>) supporting a freight car (MWK) and permitting oscillations about a longitudinal axis of the car. The oscillations of the car are coupled in the hinges so that the oscillation angle of the freight car in one hinge (SWG *>) and the oscillation angle of the freight car in the other hinge (SNWG *>) stay together. The freight car is supported over both hinges. Preferred Features: The oscillation movements of the freight car is dampened in the hinges.
