Abstract (en)

[origin: EP1580490A2] The cladding plate (1) is made from a flat cutout, which has an edge sector (3) at an angle on at least one corner region, and/or an arc-shaped curved sector (13), so that the edges (2) bounding the corner region end up spaced out from each other after bending, and the material of a cutout is deformed to produce a high boundary wall (8) in the spacing region (12).
