Abstract (en)
[origin: WO2004056257A1] Disclosed is a household appliance (1), especially a built-in household appliance, comprising a front cover (5) that is disposed in front of a front door (4), at least one optical status display device (17) which is hidden in a built-in state of the household appliance (1) and/or when the front door (4) is closed, and at least one light guide (20) for transmitting a signal light (19) emitted by the optical status display device (17). In order to improve visibility of the signal light (19) of the at least one optical status display device (17) in said household appliance (1), the optical status display device (17) is located outside a top edge (27") of the front door (4).
