Abstract (en)

[origin: WO2004041478A1] The invention relates to a bearing arrangement for vibrationally mounting a grinding disk in a grinder, more particularly in a pad sander, comprising several elastic, vibrating bodies (48) which can be connected to the grinding disk and to the grinder. According to the invention, the vibrating bodies (48) are arranged in several separate modules (42) individually or in groups of several vibrating bodies (48).
