Abstract (en)

[origin: WO2004059087A1] The invention relates to a carriageway surface comprising a carriageway surface layer composed of a concrete slab or a layer based on a bituminous construction material and a monogranular layer that is situated under the surface layer, forms a porous cavity and is delimited at least on two opposite sides by edge haunches of the carriageway surface. The invention also relates to a corresponding carriageway construction comprising a carriageway surface of this type.
