Abstract (en)

[origin: WO2004059172A1] The invention relates to a rubber-elastic assembly frame for affixing an axial ventilator, which is provided with a mounting flange, to the wall of a housing of a device which is to be cooled, comprising formed locking elements for receiving the mounting flange and retaining elements for holding the assembly frame against the wall of the housing. The retaining elements are embodied in the form of mushroom-shaped projections (10).
