Abstract (en)

[origin: WO2004056102A1] The invention relates to a device (5) for viewing a display screen (2), comprising a large-area visual medium (1) that can be placed in front of the display screen (2). The inventive device is characterized in that the visual medium (2) has a focal length  $f$  of at least 615 mm. The visual medium (2) is preferably a large-area lens (1) that is optimized for viewing an entire display screen (2) with both eyes (4).
