Abstract (en)

[origin: EP1582106A1] The garment has front and rear tails (1, 2) integrated with respect to each other by a reversible fixation unit. The front tail has upper and lower parts (5, 6) covering front and legs of a person, respectively. The parts (5, 6) are joined using two concave curve shaped edges (60, 52) to form an angle of the part (6) with respect to the part (5) to permit overlapping of lower limbs by creating minimum folds at the level of pelvis.
