Abstract (en)

It consists of first and second sheets (1, 2) with contiguous edges joined together by a hinge (3a) that allows the said first and second sheets (1, 2) to rotate, one with respect to the other until they become superposed, and covering one or more sheet-like objects (4) because the first and second sheets (1, 2) include, at least next to a part of its free edges, respective portions (1a, 2a) that are magnetically attracted to each other with sufficient force to maintain the folder-case closed with the said one or more sheet-like articles (4) held in place inside. <IMAGE>
