Abstract (en)
[origin: EP1582640A2] The joint sealing member (11) is embedded in the concrete sections (17,18). Along a side surface of a carrier member (19) and in the width direction of the carrier member, an adhesive layer is provided which comprises a component that seals the joint in a capillary manner, by crystallization. The adhesive layer may be a bituminous material. An independent claim is included for a holder for a joint sealing member.
