Abstract (en)

[origin: EP1582646A1] An additive (3,4) has a thermally-resistant core and a thermally-activatable coating added to a mixture. The thermally-resistant core in the form of granulate or fiber material is made of perlite or thermosetting plastic material. The additive has a grain size of 0.3-2.5 millimeters. Independent claims are also included for the following: (A) an additive; and (B) an insulation material board manufacture.
