Abstract (en)  
[origin: EP1582804A2] A recessed lamp structure suitable for being housed in a recessing hole formed in a panel (12) of a wall, a false ceiling or a false wall. The lamp comprises a light source (7) and a box-shaped support (6) wherein the light source is housed, and the support is integral with a plate (2) having a window (3) at which the light source is positioned. The plate is mounted pivotably on a frame (1) engaged in the recessing hole and attached to the panel, the plate being lockable in a position substantially coplanar to the panel in the frame and having a cavity (5) around the window for housing a shim such as to be flush with the panel.
