Abstract (en)

An electrical household appliance integrally embedded with an electronic circuitry comprising an electronically writable and unerasable memory medium (1) which is suitable for storing electronic records of maintenance and repairing history of an electrical household appliance is disclosed. The household appliance further comprises a communication port (3) which is suitable for connecting said memory medium (1) to an external input device (2) that is capable of reading said electronically writable and unerasable memory medium (1) and writing new data on the same. The manufacturer of the household appliance is provided with the information to trace back and monitor repair register of said household appliance so as to carry out further repair actions based on the data stored on said electronic memory medium (1).
