Abstract (en)

[origin: EP1583173A1] An antenna device (17) is composed of an antenna main body (19) and a coaxial cable (11) for connecting between the antenna main body and a signal processor for processing a signal received from the antenna main body. The coaxial cable is provided with a shielding fitting (25). The shielding fitting has a connection portion (23) to be connected and fixed to a shield portion of the coaxial cable and a mounting portion (27) for making connection and fixing to a ground.
