Abstract (en)

[origin: WO2004058033A1] The aim of the invention is the production of a device, for the spraying of items for rinsing in a dishwasher, which permits the provision of support elements (2), for housing the items for rinsing, according to the individual requirements of the various types of items for rinsing. Said aim is achieved by means of said device for the spraying of items for rinsing in a dishwasher, comprising at least one tubular spraying device (1), with holes (4) for the efflux of rinsing fluid and support elements (2) arranged thereon, for the housing of items for rinsing, whereby the at least one tubular spraying device (1) is embodied such as to be connected to the dishwasher by means of detachable connector elements (3).
