Abstract (en)
[origin: WO2004070154A1] The invention relates to a window pane with an exterior and an interior pane that are spaced apart and interlinked by means of a spacer and that can be mounted in a window or door wing that is generally fitted to a frame. The invention is characterized in that the exterior/interior pane is configured in such a manner that the exterior pane overlaps the exterior of the window/door wing and/or the interior pane overlaps the interior of the window/door wing.
