Abstract (en)

[origin: EP1584379A1] The method involves recognizing address by optical character recognition (OCR) to determine address information of an item (1). A digital print is derived from a digital image of surface having the information, when the address is not recognized by OCR, to recognize address by video encoding. An identification code is printed on the item if the recognized information relates to information of item not to be sent to an abroad addressee. An independent claim is also included for a postal item processing machine.
