Abstract (en)
[origin: EP1584425A1] The portable carrying box (10) has a pivotable U-shaped carrying handle (14), each member (16) of which on its free end has a clamp (18) gripping under a retainer (22) on the side wall of the box. The clamp has an arc-shaped section with a curvature which corresponds to a curvature of the circular arc drawn through the free end of the handle member during pivoting of the handle, or is greater than this, so that when the handle pivots from the horizontal to the vertical position the retainer comes to lie on the clamp element to finally act as a stop.
