Abstract (en)

[origin: EP1584591A1] The sheet support device (12), sheet retainer device (18), end stop device (24) and folding blade (26) are mounted in a frame which in turn is pivotally mounted in another frame and can be swung upwards. The module (10) comprises a sheet support device used to support a supplied sheet in a transport plane, a retainer device for the supplied sheet, an end stop device against which the leading edge of the supplied sheet will come to rest, a folding blade located above the sheet support device and a pair of folding rolls (28) located beneath the sheet support device and opposite the folding blade.
