Abstract (en)

The object of the invention is a method and a telecommunications network (1) for carrying a digital broadcast signal to a wireless terminal device (5). In the method, at least one transmitter (4) transmits a digital broadcast signal and at least one wireless terminal device (5) receives said digital broadcast signal. Further, in the method at least one receiver (7) receives the digital broadcast signal transmitted by the transmitter (4) and carries the received digital broadcast signal to at least one master antenna network (3). An antenna means (6) forwards the digital broadcast signal received from the master antenna network (3) to the wireless terminal device (5) over the air.
