Abstract (en)
[origin: WO2004066447A1] The invention relates to a plug or a socket consisting of a plurality of individual parts or modules (1 to 5) and pertaining to a plug-type connector for the rapid connection system, said modules (1 to 5) comprising at least one housing which can be metallised or consists of metal. At least one conductive core (6.3) of an especially multi-core cable (6) can be connected to a contact partner (1.1) of the plug or the socket by means of insulation displacement connection, the cable (6) is provided with a shield, and the plug or socket is embodied in such a way as to be connected to the shield for the assembly of the plurality of modules (1 to 5). According to the invention, a separate contacting element is provided in order to establish the electrical connection between the housing and the shield for the assembly of the plurality of modules (1 to 5).
