Abstract (en)
[origin: WO2004066600A1] This invention shows that a target word or phrase can be inputted effectively using an index and applying a full input method(FIM). Moreover, this inventions shows an example in which a (language restricted) concurrent input method(CIM) is applied effectively. In addition, this invention proposes an input system for inputting various characters by combination of a long stroke of a specific button and a repeat stroke of the specific button, or by combination of a long stroke of a specific button and a repeat stroke of a control button.
