Abstract (en)

The composite tableware comprises a main part (10) of an utensil and a handle (20). The main part includes a utility portion (11) and a handle-connecting portion (12) is integrally shaped, an opening is provided on an outer end of the handle-connecting portion, a fixing hole (122) is provided at the opening; the handle is formed by injection shaping, extruding and melting, and is tightly connected to the interior of the handle-connecting portion through the opening to tightly connect with the main part. <IMAGE>
