Abstract (en)

[origin: EP1586516A1] The present invention relates to a system for washing large urban solid waste containers, which containers may or may not be underground and in which the waste is released through the bottom. The system mounted onto a heavy vehicle (1) fitted with a crane (2) to which a device (3) is attached for moving the containers. On an appropriate structure (4) mounted onto the heavy vehicle (1), the following parts are assembled: three tanks forming a single unit (5); a washing vessel in which it is possible to completely immerse the container that is to be washed; and washing units (6,7) for washing the outside of the container and inside of the container. <IMAGE>
