Abstract (en)

[origin: EP1586708A2] The device has a pair of locking spindles (80) to penetrate into a set of locking holes provided on a set of cross arms (20A) integrated to a tool conformed to a standard. Another pair of locking spindles (9) penetrate into another set of locking holes, of different diameter, provided on another set of cross arms integrated to another tool conformed to another standard. The spindles are jointly driven by a locking device (8).
