Abstract (en)  
The invention relates to a starter profile for the placement of insulation plates against a wall surface to be insulated, which starter profile is built up of one or more section elements, each section element being configured as an elongated angle section comprising a first section flange to be fixed to the wall surface to be insulated and a second section flange for supporting and orienting the insulation plates, wherein at least one auxiliary section element is provided, which is arranged for interconnecting section elements that are mounted adjacently to each other. <??>The invention furthermore relates to an auxiliary section element for use with a starter profile according to the invention. <IMAGE>
