Abstract (en)

A reflector assembly with modifiable reflective surface in a lighting apparatus (10) that comprises an outer casing (11), equipped with stable positioning elements (12) and containing at least one bulb socket (14) for a bulb (15) and an internal reflective wall (16) that determines a fixed reflective surface, formed inside the casing (11), in which assembly an additional reflective wall element (17) is foreseen, able to be freely inserted and withdrawn into/from the inside of the casing (11) through stable positioning elements (18, 19) to lie over and modify the internal reflective wall (16). <IMAGE>
