Abstract (en)

[origin: WO2004065025A2] A machine for covering elements made of natural or synthetic materials includes delivering means (2) for sprinkling a polymerisable fluid material (3) on at least an element (4) to be covered and fit to be mated by band means (5) and subjected to the effect of first activation means (6) of polymerization. The machine (1) includes pressure means (7) to transmit to the band means (5), of flexible and elastic type, a force in direction of the element (4) to be covered.
