Abstract (en)
[origin: WO2004065484A1] The invention relates to the use of melamine resin foils and/or films for coating three-dimensionally structured surfaces and/or moulded bodies, made of fibrous material containing cellulose, which are post-impregnated or pre-impregnated and post-impregnated with an aqueous solution containing (i) a melamine formaldehyde condensate, (ii) an etherified melamine formaldehyde condensate and (iii) a polymer dispersion.
