Abstract (en)  
[origin: WO2004067839A1] The invention relates to composite-construction treatment equipment comprising a frame (12) and a blade holder (15) connected thereto and made of a composite material. In addition, the blade holder (15) is provided with a blade (16) and a separate backing blade (18). The blade holder (15) is removably adapted to the frame (12) using a pair of form-locking counter clamps (19). The form-lock is arranged tight in the lateral direction of the blade (16) and essentially free in the axial direction of the blade (16).
