Abstract (en)
[origin: WO2004040218A2] A thermodynamic system includes a cyclical heat exchange system and a heat transfer system coupled to the cyclic heat exchange system to cool a portion of the cyclical heat exchange system. The heat transfer system includes an evaporator including a wall configured to be coupled to a portion of the cyclical heat exchange system and a primary wick coupled to the wall and a condenser coupled to the evaporator to form a closed loop that houses a working fluid.
