Abstract (en)
[origin: US2004201537A1] An improved antenna having at least one dipole or an antenna element arrangement (11) which is similar to a dipole is distinguished in that the antenna element arrangement (11) is connected capacitively and/or electrically conductively without touching to the reflector (3) or to a reflector (3') or a substrate (3') which is non-conductive at least in the area in which the antenna element arrangement (11) is attached or mounted.
