Abstract (en)
Patch (1), for treating lips, comprises an elastically deformable support (2) and an active material on one side of the support which exerts an action on the lips, where (1) is configured to liberate the active material on the lips in response to contact with a liquid. An independent claim is also included for a kit comprising an elastically deformable support and at least a substrate containing an active material, which exhibits an action on the lips (where the support and substrate comprises an adhesive, which solidifies the substrate and the support for use).

Abstract (fr)
La présente invention concerne un patch (1) pour le traitement des lèvres (L), comportant : un support (2) élastiquement déformable, au moins un actif d'un côté au moins du support (2), cet actif étant destiné à exercer une action sur les lèvres, le patch étant configuré de telle sorte que l'actif soit libéré sur les lèvres en réponse à la mise en contact avec un liquide. <IMAGE>
