Abstract (en)

[origin: EP1588968A1] The module has a carrier structure (5) with bobbin stands (10), where each stand supports a bobbin (6). Bobbin driving devices (20) are mounted freely in rotation on their respective bobbin stands. The bobbin stands are independently removable from one another and are adjustable along a bar (15) maintained between walls (3, 4) of the carrier structure. A bobbin driving belt (16) couples multiple feed spindles (40).
