Abstract (en)

The invention concerns a method for manufacturing on circular knitting machines briefs without seams and having a front and rear parts joined by a infra-leg crutch area and shaped to define two side openings for legs and an opening at level with the waist-encircling portion The garment is manufactured starting from a first circular flat edge that defines a first opening for one leg, knitting a fabric in continuous tubular shape that defines contemporaneously the front part, the rear part and the crutch area of the garment, and finishing to a second circular flat edge that defines a second side opening for the other leg. <IMAGE>
