Abstract (en)
[origin: EP1589154A2] A multifunction unit for sanitary fittings comprises hydraulic means (9, 10) suitable to be connected to sanitary water mains for controlling water delivery to at least one water delivery outlet; said unit having an internal structure suitable to define a housing for such hydraulic means (9, 10) and to be secured to a support structure, and a covering structure externally associated to said internal structure to act as an external finish, said covering structure allowing the use of actuator means for control and adjustment of said hydraulic means (9, 10) and being equipped with hydraulic connection means for allowing fluid communication between said hydraulic means (9, 10) and said at least one water delivery outlet.
