Abstract (en)
[origin: WO2004069005A1] The invention relates to a semi-pneumatic chair consisting essentially of a pressurised cushion (1) and rigid lateral parts (8). Said lateral parts (8) are laterally adapted to the cushion (1) and can be connected to the same in a fixed or detachable manner. The seat surface and the back rest (7) are formed by the cushion (1). The combination of the pneumatic cushion (1) and the rigid lateral parts (8) forms a very light seat structure which is easy to assemble and disassemble.
