Abstract (en)
[origin: WO2004069010A1] The invention relates to a pillow which is essentially characterised in that it comprises: a central core (1) having two transverse sections (2, 3) with maximum and minimum values respectively; a cover (4) forming a sleeve (5) which is designed to receive the core, said cover comprising at least one first pouch (6) which contains a quantity of a second elastic material and a connecting wall (9) which connects the two opposite edges (7, 8) of the first pouch in order to form the sleeve (5); and means (11) for compressing the second elastic material contained in the first pouch (6) essentially in a first plane (12) which passes through the maximum transverse section (2) of the central core (1).
