Abstract (en)

[origin: WO2005016758A1] The invention relates to a device and a method for fixing closing films to pouring elements (A) arranged on composite packages (P), said device comprising a cyclical transport device (11) for transporting the closing films (8), a supply device (15), a welding device (25), and a transport device (33) for transporting the composite packages (P). The aim of the invention is to provide a reliable and rapid production process. To this end, the welding device (25) is arranged above the transport device (33), the supply device (15) comprises at least one clamping device (18) for receiving the closing films (8) and is displaceably arranged between a receiving position (19) and a welding position (20), and the receiving position (19) faces the cyclical transport device (11) and the welding device (25) faces the transport device (33).
