Abstract (en)

[origin: WO2004063032A2] A rigid package for tobacco articles has an outer first box (6) having a top end opening (12); a second box (15) inside the first box (6) and having an end opening (22) corresponding with the end opening (12) of the first box (6); and an intermediate member (24) interposed between the first and second box (6, 15) and fixed internally to one of the walls (8) of the first box (6); the intermediate member (24) surrounds the second box (15), and can assume at least two limit axial positions corresponding to two different positions of the second box (15), wherein a first portion (29a) of the intermediate member (24), defining a lid (30) for closing the aforementioned openings (12, 22), assumes respective positions opening and closing the openings (12, 22).
