Abstract (en)

[origin: WO2004023044A1] The invention relates to a support unit (1), particularly for a cooking appliance (2), comprising at least one support means (3) and at least one first means (4) which receives a first support part (11) of the support means (3) and can be fastened to a wall (10). In order to create a generic support unit (1) which allows tolerance to be compensated in a simple manner and is easy to mount and dismount, the inventive first receiving means (4) is provided with at least one first receiving area (12) for introducing the first support part (11) in a first direction of introduction (13) and a second receiving area (14) into which the first support part (11) can be moved after being introduced.
