Abstract (en)

[origin: EP1591052A2] Vacuum and blowing apparatus is provided having means for selecting between a first vacuum mode and a second blowing mode. A base portion of the apparatus is in contact with a surface from which debris is to be collected and/or across or relative to which debris is to be blown in use and, depending from the base portion, a body portion of the apparatus supports a collection box for the reception of debris collected from the surface.
