Abstract (en)
[origin: EP1591244A2] The cleaning process is for a press with an automatically emptying separator (16) which separates out the dirt and oil from the damping water, takes it as a mixture to a mixture container (24), and the remaining damping water to the damping water container (20). The mixture in the mixture container is deposited in layers. The layer containing the damping water is run off through an overflow (26) into the moisture container.
