Abstract (en)

[origin: EP1591271A1] The ends of each intermediate layer (13-15), positioned between a carrier layer (11) and a covering layer (12), are made shorter relative to those of the carrier layer and are sealed with a sealing layer (16). The sealing layer extends over the carrier layer so that the transfer blanket (10) can be fastened at the clamping point (17) of a printing press via the carrier layer and sealing layer.
